An ISO 9001:2015 Certified

Our Services

Design

We design fire protection and detection, suppression systems and centralized LP gas systems to meet individual needs according to the local and international standards and regulations, assuring the quality and reliability of our products and services. Proactive action is expected from everybody at Alpha. Our philosophy is to focus on prevention by "doing the right thing right the first time."

Installation

We design, supply, install, test and commission total fire safety and solutions on land, sea and air. Our solutions range from fire alarm systems to suppression systems, deluge systems, sprinkler systems, cooking facility protection and more. We are also dedicated to protect the health and safety of our employees, customers, contractors and suppliers while safeguarding the environment in which we live and work.

Testing & Commissioning

We commission the installed systems, confirming that interconnected fire systems are functioning according to the design criteria and operational needs, including compliance requirements of applicable local and international regulations and standards.

Service, Repairs & Maintenance

We provide island wide services and maintenance of all type of fire equipment. We readily upgrade existing fire systems according to the standards.

Fire Trainings

We provide fire trainings and demonstrations on how to identify and use of various types of fire equipment in practically. We prepare fire evacuation plans and train how to rescue in a fire incident.
